

2005 ENVIROTHON

QUESTIONS FOR JUDGES TO ASK

1. The scenario is an example of how the development of natural resources affects both cultural and natural landscapes. Briefly explain an example of landscape change brought about by the Central Valley Project.
2. Briefly explain the natural process by which natural levees are formed along free flowing streams.
3. In your opinion, what responsibility do landowners along the San Joaquin River have in regard to public access to the river for recreational purposes?
4. As part of the San Joaquin River restoration, should parks and other public recreational facilities be provided along the river? If your answer is no, explain the rationale for your opinion. If your answer is yes, how should this be done and who should bear the cost.
